

## ONLINE E-BOOK STATIONARY

### Scenario:

This project is designed so as to be used by specializing in online e-book to Readers. If the reader need to download the pdf file then the registration is required otherwise, not. In the registration required fields like as Name, email address, phone number, password must be filled up to complete the registration. This registration filled follows all kind of user. Only registered user can have logged in into the system. Only Admin update the new books in every week. Author gives the book design details to the designer and Designer filled up the requirements to design the book by author name, ISBN verification number, book title in the image file. Then designer sends the image file to the Author. If the Author, select the image file (cover page) then the author go to the next step can write the book in text file. Otherwise, when author can't accept the cover page design, he can design himself or can hire the other designer. Finally, Author get the image file (cover page) and his text file combined together converted to the pdf file. Author send the pdf file to the Publisher (Admin). Then publisher (Admin) check the pdf file. When Admin upload the book, the Author can get the email confirmation. Finally, Admin Published the book in online. Reader can read a portion of the book in online. If he is interested to the book, then he can download the pdf file. If any reader doesn't register himself then redirect the site to the registration page. When registration is completed then a confirmation mail send to the reader's email. Then the reader click link and confirm the authentication. In the web site the book's cover page is the image of the pdf file. By clicking the pdf file reader gets all the details about the book like (when the book is published, date, author name, total page number, related books details etc.). It is an online e-book stationary through which readers can view different types of booklist.

## **Functional Requirement:**

1. Registration
2. Book Design
3. Book Published
